ONGOING REPAIRS & MAINTENANCE

The 2020 quinquennial inspection report has identified a first tranche of problems in various areas of the fabric that require immediate attention with repairs to cracks and holes in the lead roofs; cleaning of moss, repairs to cracks and repointing of the stonework; and repairs to areas of glazing. This work is likely to amount to £100,000 - £150,000.

We have consulted with the architects and along with PCC and Diocese approval they will be sending this out to tender to get this priority work done in 2020. The builders that worked on the sacristy indicated that working on large churches like ours was the kind of work they can carry on with as social distancing is easily possible in such a large area.

In the next five years a further approximately £570,000 of work will need to be carried out which will include re-leading of roofs and re-wiring of the complete building.

Meanwhile although our architects are presently furloughed we hope to have some more detailed plans soon showing the design of the internal alterations that we put to them in our brief last year which will include installing a good heating system, replacing the floor and moving the organ to the west end, their plans will also include the design and layout of a proposed extension with modern toilet and kitchen facilities and additional meeting rooms. We understand their work is fairly well advanced and this period of time has given them breathing time to reflect on the design best suited for St Mary's.

Completed during isolation, a 1:100 scale architectural model to help with visualising the future extension etc.
